A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a

document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Virtualization has been one of the most potent forces reshaping the landscape of systems software in the last 10 years and has become ubiquitous in the realm of enterprise compute infrastructure and in the emerging field of cloud computing. This presents a variety of new opportunities when designing host based security architectures. We present several paradigms for enhancing host security leveraging the new capabilities afforded by virtualization. First, we present a virtualization based approach to trusted computing. This allows multiple virtual hosts with different assurance levels to run concurrently on the same platform using a novel "open box" and "closed box" model that allows the virtualized platform to present the best properties of traditional open and closed platforms on a single physical platform. Next, we present virtual machine introspection, an approach to enhancing the attack resistance intrusion detection and prevention systems by moving them "out of the box" i.e. out of the virtual host they are monitoring and into a separate protection domain where they can inspect the host they are monitoring from a more protected vantage point. Finally, we present overshadow data protection, an approach for providing a last line of defense for application data even if the guest OS running an application has been compromised. We accomplish this by presenting two views of virtual memory, an encrypted view to the operating system and a plain text view to the application the owning that memory. This approach more generally illustrates the mechanisms necessary to introduce

new orthogonal protection mechanisms into a Guest Operating system from the virtualization layer while maintaining backwards compatibility with existing operating systems and applications.

The Accounting and Review Services Committee (ARSC) has issued Statement on Standards for Accounting and Review Services No. 21, Statements on Standards for Accounting and Review Services: Clarification and Recodification. The issuance of SSARS No. 21 represents a major milestone in the ARSC ' s project to clarify and revise the standards for reviews, compilations, and engagements to prepare financial statements. To assist readers to easily locate information, a detailed table of contents is provided at the beginning of the SSARS. This statement recodifies and supersedes all outstanding SSARSs through No. 20, except SSARS No. 14, Compilation of Pro Forma Financial Information. SSARS No. 21 is effective for reviews, compilations, and engagements to prepare financial statements for periods ending on or after December 15, 2015 but early implementation is permitted. This statement is a standalone SSARS and is not a codification of all clarified SSARSs. This statement has been codified in AICPA Professional Standards, which contains a complete codification of Statements on Standards for Accounting and Review Services. Practitioners are advised to use the codified version of this SSARS as they prepare to evaluate and update their methodologies, and prepare for changes precipitated by the clarity project.

The ancient Greek philosopher Epicurus (340-271 BCE), though often despised for his materialism, hedonism, and denial of the immortality of the soul during many periods of history, has at the same time been a source of inspiration to figures as diverse as Vergil, Hobbes, Thomas Jefferson, and Bentham. This volume offers authoritative discussions of all aspects of Epicurus's philosophy and then traces out some of its most important subsequent influences throughout the Western intellectual tradition. Such a detailed and

comprehensive study of Epicureanism is especially timely given the tremendous current revival of interest in Epicurus and his rivals, the Stoics. The thirty-one contributions in this volume offer an unmatched resource for all those wishing to deepen their knowledge of Epicurus' powerful arguments about happiness, death, and the nature of the material world and our place in it. At the same time, his arguments are carefully placed in the context of ancient and subsequent disputes, thus offering readers the opportunity of measuring Epicurean arguments against a wide range of opponents--from Platonists, Aristotelians and Stoics, to Hegel and Nietzsche, and finally on to such important contemporary philosophers as Thomas Nagel and Bernard Williams. The volume offers separate and detailed discussions of two fascinating and ongoing sources of Epicurean arguments, the Herculaneum papyri and the inscription of Diogenes of Oenoanda. Our understanding of Epicureanism is continually being enriched by these new sources of evidence and the contributors to this volume have been able to make use of them in presenting the most current understanding of Epicurus's own views. By the same token, the second half of the volume is devoted to the extraordinary influence of Epicurean doctrines, often either neglected or misunderstood, in literature, political thinking, scientific innovation, personal conceptions of freedom and happiness, and in philosophy generally. Taken together, the contributions in this volume offer the most comprehensive and detailed account of Epicurus and Epicureanism available in English.

It has never been more important to articulate the wonder and enchantment of the Christian message. Yet the traditional approaches of apologetics are often outmoded in an age of profound disenchantment and distraction, unable to meet this pressing need. This winsome apologetics book for a new generation makes the case that Christianity offers a compelling explanatory framework for making sense of our world. Pastor and writer Gavin Ortlund believes it is essential to appeal not only to the mind but also to the heart and the imagination as we articulate the beauty of the gospel. *Why God Makes Sense in a World That Doesn't* reimagines four classical theistic arguments--cosmological, teleological, moral, and Christological--making a cumulative case for God as the best framework for understanding the storied nature of reality. The book suggests that Christian theism can explain such things as the elegance of math, the beauty of music, and the value of love. It is suitable for use in classes yet accessibly written, making it a perfect resource for churches

This work contributes to the research in the linguistic analysis of Old English with corpus-based lexical databases. In the specific area of Old English, which presents numerous morphological variations and lacks a written standard, a lemmatised corpus is necessary. Thus, the aim of this work is to lemmatise part of the verbal lexicon of Old English, combining aspects of Morphology, Lexicography and Corpus Analysis. The scope is restricted to the most morphologically complex verbal classes of Old English, including irregular verbs and reduplicative verbs, which comprise preterite-present, anomalous, contracted and strong VII verbs. This aim requires, firstly, the selection and management of the sources of data and verification of results; and secondly, the design and sequencing of the steps of the lemmatisation tasks. This research also raises the issue of the automatism of the process of lemmatisation of Old English verbs, on which little previous literature has been found. In conclusion, this work offers an inventory of inflectional forms and lemmas of the verbs under analysis. On the applied side, this work presents different procedures of automatic and manual lemmatisation that can be applied to the fields of Lexicography and Corpus Linguistics.

Compiled in honor and celebration of veteran anthropologist Harold C. Fleming, this book contains 23

articles by anthropologists (in the general sense) from the four main disciplines of prehistory: archaeology, biogenetics, paleoanthropology, and genetic (historical) linguistics. Because of Professor Fleming ' s major focus on language — he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue — the content of the book is heavily tilted toward the study of human language, its origins, historical development, and taxonomy. Because of Fleming ' s extensive field experience in Africa some of the articles deal with African topics. This volume is intended to exemplify the principle, in the words of Fleming himself, that each of the four disciplines is enriched when it combines with any one of the other four. The authors are representative of the cutting edge of their respective fields, and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them.
