1 Guidance | Caesarean section | Guidance | NICE

A caesarean section, or C-section, is an operation to deliver your baby through a cut made in your tummy and womb. The cut is usually made across your tummy, just below your bikini line. A caesarean is a major operation that carries a number of risks, so it's usually only done if it's the safest option for you and your baby.

Caesarean section - NHS

Your wound (area cut for the caesarean section) will be covered with a waterproof dressing which allows the midwife to see your wound so an assessment can be made. The midwife will give you advice about removing the dressing on day 7 after your caesarean section.

Caesarean Section Wound Care Nphs Wales Nhs | glasatelieringe

Caesarean section (NICE clinical guideline 132) This guideline has been developed to help ensure consistent quality care for women who have had a caesarean section (CS) in the past and are now pregnant again or have a clinical indication for a CS or are considering a CS when there is no other indication.

Caesarean section (NICE clinical guideline 132)

Abstract Cesarean delivery (CD) is one of the most common procedures performed in the United States, accounting for 32% of all deliveries. Postpartum surgical site infection (SSI), wound infection and endometritis is a major cause of prolonged hospital stay and poses a burden to the health care system.
