History of art and science together. Many photography timelines start with the first known photograph by Nic é phore Ni é pce in 1827. But it actually goes much further back than that. It goes back to a time and technology before lenses, cameras, and even film.
Camera Obscura: 500 BCE - 1600 CE

History of Photography Timeline From Start to Present Day

This understanding of photography ' s supposed objectivity has dominated evaluations of its role in the arts. In the early part of its history, photography was sometimes belittled as a mechanical art because of its dependence on technology. In truth, however, photography is not the automatic process that is implied by the use of a camera.
