This book is aimed at an audience consisting of two kinds of readers. The first is people who are curious about 3D printing and want more information without necessarily getting deeply into it. For this audience, the first two chapters will be of greatest interest. They provide an overview of 3D print technology. They also serve to take the confusion out of the jargon and make sense out of such shortcuts as SLA, FFF, FDM, DLP, LOM, SLM, DMLS, SLS, EBM, EBAM, CAD and others. They describe the basic processes, the materials used and the application of the technology in industry, space, medicine, housing, clothing and consumer-oriented products such as jewelry, video game figures, footwear, tools and what must now seem like an infinity of bunnies, eagles and busts of Star Wars and Star Trek figurines in a dazzling array of colors. This book also addresses the needs of people new to the field who require information in a hurry. Chapter 3 serves as a guide to generating a 3D model by reviewing scanning methodology, the various types of software available to create a model and the steps needed to insure a useful printed object from the 3D model. The chapter has numerous references which, together with the information in the text, will help one find quickly any additional information available on the internet. Keywords: 3D Printing, 3D Software, 3D Hardware, Printing Materials, Scanning, 3D Modeling, Jewelry, Medicine, Housing, Space

Az előző e-könyvekben megismerkedtünk CorelCAD 2014 programmal létrehozható egyszerűbb rajzelemekkel. A kialakított objektumok jellegzetességei közé tartoznak azok színei, vonaltípusa és az, hogy az adott rajzelem melyik fólián helyezkedik el. A korábbiak szerint létrehozott rajzelemek e jellemzők alapértelmezés szerinti értéket kaptak. Ebben a kötetben áttekintjük, hogyan tudjuk ezeket a jellemzőket megváltoztatni, újakat létrehozni, meglévőket megszüntetni és a létező rajzelemekhez kapcsolni. A rajzi információ szervezését támogatja a fóliák használata és a rajzelemek fóliákon rendszerezése. A fóliák egyfajta rajzi réteget képviselnek, amelyeken a különböző jellegű rajzi információk csoportosíthatók és szervezhetők. Alkalmazásuk az írásvetítőknél használatos átlátszó fóliákhoz hasonlítható, a szükséges részleteket tartalmazó fóliát a vetítőre helyezük, a feleslegeseket levesszük (anélkül, hogy a rajtuk lévő információ sérülne, illetve bármiféle torzulást szenvedne). A kötetben tárgyaljuk az egyéni vonaltípusok létrehozását is.
