In search of answers and  
action, the award-  
winning poet and  
essayist Lisa Wells  
brings us *Believers*,  
introducing trailblazers  
and outliers from across  
the globe who have  
found radically new  
ways to live and  
reconnect to the Earth

in the face of climate change. We find ourselves at the end of the world. How, then, shall we live? Like most of us, Lisa Wells has spent years overwhelmed by increasingly urgent news of climate change on an apocalyptic scale. She did not need to be convinced of the stakes, but she could not find

practical answers. She embarked on a pilgrimage, seeking wisdom and paths to action from outliers and visionaries, pragmatists and iconoclasts.

Believers tracks through the lives of these people who are dedicated to repairing the earth and seemingly undaunted by the task ahead. Wells meets an itinerant

finds a group of

Mexico and another  
group in Philadelphia  
turning the tools of  
violence into tools of

She talks with survivors of catastrophic wildfires in California as they try to rebuild in ways that acknowledge

the fires will come again. Through empathic, critical portraits, Wells shows that these trailblazers are not so far beyond the rest of us. They have had the same realization, have accepted that we are living through a global catastrophe, but are trying to answer the next question: How do

A new, fully updated narrative edition of David Attenborough's seminal biography of our world, *The Living Planet*. Nowhere on our planet is devoid of life. Plants and animals thrive or survive within

Every extreme of climate and habitat that it offers. Single species, and often whole communities adapt to make the most of ice cap and tundra, forest and plain, desert, ocean and volcano.

These adaptations can be truly extraordinary: fish that walk or lay eggs on leaves in mid-air; snakes that fly; flightless birds that graze like

deer; and bears that grow hair on the soles of their feet. In *The Living Planet*, David Attenborough's searching eye, unfailing curiosity and infectious enthusiasm explain and illuminate the intricate lives of the these colonies, from the lonely heights of the Himalayas to the wild creatures that have established

themselves in the most recent of environments, the city. By the end of this book it is difficult to say which is the more astonishing - the ingenuity with which individual species contrive a living, or the complexity of their interdependence on each other and on the habitations provided by our planet. In this new

edition, the author, with the help of zoologist Matthew Cobb, has added all the most up-to-date discoveries of ecology and biology, as well as a full-colour 64-page photography section. He also addresses the urgent issues facing our living planet: climate change, pollution and mass extinction of species.

The world faces an environmental crisis unprecedented in human history. Carbon dioxide levels have reached heights not seen for three million years, and the greatest mass extinction since the time of the dinosaurs appears to be underway. Such far-reaching changes suggest something

# Where To Download

remarkable: the beginning of a new geological epoch. It has been called the Anthropocene. The Birth of the Anthropocene shows how this epochal transformation puts the deep history of the planet at the heart of contemporary environmental politics. By opening a window

A Life On A

onto geological time, the idea of the Anthropocene changes our understanding of present-day environmental destruction and injustice. Linking new developments in earth science to the insights of world historians, Jeremy Davies shows that as the Anthropocene epoch begins, politics and

# Where To Download

geology have become  
inextricably entwined.

Over six thousand years ago in the regions of the third heaven, a Triune council of the Holies, the Father, Son and Holy Spirit, brought about the creation of heaven and earth and all that was created in the six days as we have record of written in the

# Where To Download

Word of God. In the likeness of the Triune God was man created, being formed from the dust of the ground. God breathed into his nostrils the breath of life and man became a living soul. God planted a garden eastward in Eden and there he put the man whom he had formed. I have not the pen or vocabulary to

# Where To Download

describe the pristine beauty that this garden entailed prior to the first footprint impressed upon this sacred garden. Then God said. "it is not good that man should be alone", and He made a help meet for him, so the first parents perfect environment of no sin, no decay; a paradise for eyes to behold. But alas, sin entered and Adam

# Where To Download

and Eve were put out of the garden and we have the fall of mankind; the fall of no hope. It had become certain that death would reign and only the Triune God had made plans for the redemption of mankind, all knowing that man would sin and fall victim to sin and that redemption plan was already decided

# Where To Download

beforehand in the regions of the third heaven long before man was created. The redemption plan was provided to come into the world as the Son of God, the hypostatic union, meaning Christ's humanity and divinity in one hypostasis, or individual existence, being born by a miraculous entry into

# Where To Download

the world. We will never understand how God and man could unite in one person. The deep things and mysteries of God are far beyond our horizon. Although He was in the likeness of men, that refers to the human nature. He was sinless and He appeared as man in looks and dress but was unlike the natural man in that sin

# Where To Download

was not an integral part in his unfallen human nature. He had to become man in order to die on the cross for you and me. But He did not diminish the Person.

The two natures in Christ are not fused together, they remain distinct and different.

Let me say He did not give up Deity or the use of His attributes of

# Where To Download

Deity. Read Isaiah  
53:12. He poured out  
His soul unto death.  
None of Christ's divine  
attributes were  
relinquished. However,  
He obscured His  
majestic glory while  
embodied by the earthly  
body. Recorded in the  
four Gospels is what we  
have of the life of Christ  
on this earth. There is  
no complete biography

# Where To Download

that could ever be written of the life of Christ on the earth because there are so many details not given.

The four Gospels give its own emphasis of how they described the works and life of Christ. The false teachings of cults and critics and evolutionary of man becoming gods is not what our Bible says; it is

# Where To Download

opposite the false teachings. The Bible says God became man, who was Jesus Christ, both man and God.

This book will transform the way you view yourself and live your life 'Lifenotes' is a Metaphysical exploration of the

# Where To Download

human condition on planet Earth, and as such is much more than just another discussion about creative visualization. You'll be delighted and surprised to discover the deep and intriguing twists presented by the author, as step by step, arguments and techniques provide ways of looking at Life's

# Where To Download

numerous challenges through entirely different eyes. After reading this book, your perception of what a human life is all about will be altered forever in many constructive ways. In turn, such fundamental changes to your world-view can become the beginning of an entirely new and exciting chapter of your

# Where To Download

Life Journey. Reading 'Lifenotes', you'll find yourself reconsidering various things you may have believed about yourself and life, such as reincarnation being a simultaneous rather than sequential process; that creative visualization is ultimately a journey into spirituality - not just materiality; that we are

# Where To Download

Co-creators - not the  
Creator; that creative  
visualization certainly  
works, but requires both  
understanding and  
skill... and much more.

Here is a book for the  
novice within the  
Metaphysical arena of  
thinking, as well as for  
those who have already  
done much research and  
practice in this field.

Both kinds of readers

# Where To Download

will find much to  
delight, challenge and  
augment their ability to  
live the human  
experience from a  
greatly enhanced point  
of empowerment.

The animals we find  
today in a tidepool  
reflect the winners and  
losers of an event 250  
million years ago when  
the Earth suffered the

greatest biotic crisis in its history, with some 95% of all living species being wiped out. This text explores the possible causes of this mass extinction.
