1968 looks like it'll be a pretty good year for Jaynell Lambert. The town's going to pave the dirt road she lives on, her girly-girl sister, Racine, isn't driving her completely crazy, and Grandpap has just moved in with his new emerald green Cadillac convertible. Jaynell and Grandpap have something special. But why won't Grandpap tell her the reason he visits with the dirt-poor Pickens family on the other side of town? When Jaynell finds out Grandpap's secret, the legacy of an old man transforms a family, and a town. "At once gritty and poetic, stark and sentimental . . . a solid page turner. Holt once again displays her remarkable gift."(School Library Journal, starred review)

Integrates Vehicle, Signal, and Road Lighting into a Unified System Many people drive many miles after dark and rely on lighting to help them gather information about the road ahead and the presence and intentions of other people on and near the road. With new technology on the industry's horizon, Lighting for Driving: Roads, Vehicle, Signs and Signals conveys the crucial role lighting plays in road safety and examines how it could be used more effectively. Authored by a lighting and visibility expert, this book explains the thinking and scientific reasoning behind various forms of lighting and analyzes their contribution to the driver's understanding of real and potential road hazards. Filled with useful information, this resource straightforwardly addresses a wide range of safety factors encountered in real driving situations, such as weather conditions, complex signage, and driver age. It also deals with the often-ignored consequences of too much light, such as light trespass and sky glow. Comprehensively Explores the Field, Emphasizing Improved Safety Vehicle, road, sign, and signal lighting are provided to enable drivers to reach their destinations quickly and safely. However, the attention given to how these forms of lighting function is likely to change as new technology is introduced and understanding of ergonomics and human factors improves. This book effectively illustrates how these forms of lighting can be modified to work together to best provide a coherent flow of information to the driver.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
