The system of an equation

Read Free Equations With Infinitely Many Solutions

has infinitely many solutions when the lines are coincident, and they have the same y -intercept. If the two lines have the same y -intercept and the slope, they are actually in the same exact line. In other

Read Free Equations With Infinitely Many Solutions

words, when the two lines are the same line, then the system should have infinite solutions. It means that if the system of equations has an infinite number of solution, then the system is said to be consistent.
