Series 60 Injector Height Adjustment.

The injector height is adjusted using the injector height gage, J 39697 (DDEC III/IV) or J 35637-A (DDEC II and I). On engines equipped with a Jake Brake ® , move the handle on the injector height gage to the alternate position, 90 degrees to the shank. A height gage pilot hole is provided in the fuel injector body on the machined surface contacted by the injector clamp near the solenoid.

He replaced both injectors and the injector harness (as suggested by Detroit), set the injector height to what the valve cover said (78.2 mm) and did a tune up.

Series 60 Injector response time too long - MHH AUTO - Page 1

Injector Height Gauge Set Injector height gauges are used to properly set injector body height to the injector follower for proper fuel injector timing. Incorrect injector timing can cause engine power issues, poor idle quality and fuel mileage issues. For use Detroit Diesel Two cycle 53, Two cycle 71, Two cycle 92, Series 60, and DDEC IV Engines.
