Chicago on 11 September 1893, this provocative study seeks to rescue the historical Vivekananda from the celebrated Swamiji of the legend and hagiography. Using a variety of primary and contemporary secondary sources, including eyewitness accounts in English as well as Bengali, Professor Narasingha P. Sil examines Vivekananda's early life and education, his meeting and relationship with his future mentor Sri Ramakrishna Paramahansa, and the circumstances leading to his embracing monastic life. Analyzing Vivekananda's numerous sermons, speeches, conversations, and letters, Sil exposes the Swami's deliberate distortion of facts and purposive misinformation on, and

The book also takes a hard look at his universally acknowledged reputation as a hypercosmological renouncer who championed the causes of the poor and the downtrodden and thus exemplified the doctrines of socialism at their finest. Sil is the first scholar to critically examine Vivekananda's attitude toward women in general and to probe into his experience with Margaret Noble (Sister Nivedita) in particular, and he is the first author to provide a detailed analysis of Vivekananda's popularity as a preacher and lecturer.

Since the late 1960s, the survival rate in children and adolescents diagnosed with cancer has steadily improved, with a corresponding decline in the cancer-specific death rate. Although the improvements in survival are encouraging, they have come at the cost of acute, chronic, and late adverse effects precipitated by the toxicities associated with the individual or combined use of different types of treatment (e.g., surgery, radiation, chemotherapy). In some cases, the impairments resulting from cancer and its treatment are severe enough to qualify a child for U.S. Social Security Administration disability

This book presents selected papers on the factors that serve to influence an individual's capacity in financial decision-making. Initial chapters provide an overview of the cognitive factors affecting financial decisions and suggest a link between limited cognitive capacity and the need for financial education. The book then expands on these cognitive limitations to explore the tendency for overconfidence in decision-making and the interplay between rational and irrational factors. Later contributions show how credit card companies benefit from limitations in consumer financial literacy,
