The P420i is in HBA mode already from a previous role. We need to exit HBA mode and return to non HBA mode (guessing the default is RAID mode). We have scoured the interweb for solutions - all of which go 'into' HBA mode, but none how to exit out of HBA. [edit] The P420i firmware is v6.68. DL380p BIOS is P70.

Hello. I have replaced the cache module batteries with new original batteries, made firmware upgrade on Smart Array P410i controller to version 6.64 (previsous was 6.0), made BIOS upgrade on server Proliant DL 350 G6 and the errors code still remains: Accelerator Temporarily Disabled / Cache Disabled Low Batteries.

Culturally Responsive School Leadership focuses on how school leaders can effectively serve minoritized students—those who have been historically marginalized in school and society. The book demonstrates how leaders can engage students, parents, teachers, and communities in ways that positively impact learning by honoring indigenous heritages and local cultural practices. Muhammad Khalifa explores three basic premises. First, that a full-fledged and nuanced understanding of “cultural responsiveness” is essential to successful school leadership. Second, that cultural responsiveness will not flourish and succeed in schools without sustained efforts by school leaders to define and promote it. Finally, that culturally responsive school leadership comprises a number of crucial leadership behaviors, which include critical self-reflection; the development of culturally responsive teachers; the promotion of inclusive, anti-oppressive school environments; and engagement with students’ indigenous community contexts. Based on an ethnography of a school principal who exemplifies the practices and behaviors of culturally responsive school leadership, the book provides educators with pedagogy and strategies for immediate implementation.

Much of everyday work is done through talk between practitioner and client. Conversation Analysis is the close inspection of people's use of language in interaction. The work reported in this collection shows how CA can be used to identify, and improve, communicative practices at work.

Understand and implement VMware Virtual SAN: the heart of tomorrow's Software-Defined Datacenter (SDDC) VMware's breakthrough Software-Defined Datacenter (SDDC) initiative can help you virtualize your entire datacenter: compute, storage, networks, and associated services. Central to SDDC is VMware Virtual SAN (VSAN): a fully distributed storage architecture seamlessly integrated into the hypervisor and capable of scaling to meet any enterprise storage requirement. Now, the leaders of VMware's wildly popular Virtual SAN previews have written the first authoritative guide to this pivotal technology. You'll learn what Virtual SAN is, exactly what it offers, how to implement it, and how to maximize its value. Writing for administrators, consultants, and architects, Cormac Hogan and Duncan Epping show how Virtual SAN implements both object-based storage and a policy platform that simplifies VM storage placement. You'll learn how Virtual SAN and vSphere work together to dramatically improve resiliency, scale-out storage functionality, and control over QoS. Both an up-to-the-minute reference and hands-on tutorial, Essential Virtual SAN uses realistic examples to demonstrate Virtual SAN's most powerful capabilities. You'll learn how to plan, architect, and deploy Virtual SAN successfully, avoid gotchas, and troubleshoot

problems once you're up and running. Coverage includes Understanding the key goals and concepts of Software-Defined Storage and Virtual SAN technology Meeting physical and virtual requirements for safe Virtual SAN implementation Installing and configuring Virtual SAN for your unique environment Using Storage Policy Based Management to control availability, performance, and reliability Simplifying deployment with VM Storage Policies Discovering key Virtual SAN architectural details: caching I/O, VASA, witnesses, pass-through RAID, and more Ensuring efficient day-to-day Virtual SAN management and maintenance Interoperating with other VMware features and products Designing and sizing Virtual SAN clusters Troubleshooting, monitoring, and performance optimization

A collection of blessings, poems, meditations, and rituals presented in English and Hebrew offers a traditional perspective to weekday, Sabbath, and New Moon festival observances

This definitive field guide is the only guide to use a fully integrated photographic approach to profile the extraordinary range of birds found in eastern North America. The highest-quality photography brings nearly 500 species to life on the page, capturing their beauty and making identification quick and effortless. The 393 species most commonly seen east of the 100th Meridian (in the United States, the region east of the Rocky Mountains) are featured in full-page profiles that emphasize all the information needed to identify them. Diagnostic photographs are silhouetted and clearly annotated, and any plumages, whether female, juvenile, subspecies, and winter or summer, that differ noticeably from the primary image are also included and labeled accordingly. Detailed similar species boxes show the plumage that is most similar—in some cases the female or juvenile rather than the featured adult—and the most significant differences are picked out. Stunning context photographs show the bird at home, in its normal habitat or performing behavior that is typical of that species. Schematic artworks show the shape and posture of the bird in flight as well as its coloration, and a diagram of its flight pattern is also included. The border of Texas and Mexico is a popular destination because of the many species that can be seen nowhere else in eastern North America. The 60 most common of these southern gems are profiled in their own section of quarter-page entries, each with a stunning photograph annotated to point out the most significant field marks. A separate section profiles 44 species that are particularly uncommon or local in their distribution.

An extraordinary and beautifully illustrated exploration of the medieval world through twelve manuscripts, from one of the world's leading experts. Winner of The Wolfson History Prize and The Duff Cooper Prize. A San Francisco Chronicle Holiday Book Gift Guide Pick! Meetings with Remarkable Manuscripts is a captivating examination of twelve illuminated manuscripts from the medieval period. Noted authority Christopher de Hamel invites the reader into intimate conversations with these texts to explore what they tell us about nearly a thousand years of medieval history – and about the modern world, too. In so doing, de Hamel introduces us to kings, queens, saints, scribes, artists, librarians, thieves, dealers, and collectors. He traces the elaborate journeys that these exceptionally precious artifacts have made through time and shows us how they have been copied, how they have been embroiled in politics, how they have been regarded as objects of supreme beauty and as symbols of national identity, and who has owned them or lusted after them (and how we can tell). From the earliest book in medieval England to the incomparable Book of Kells to the oldest manuscript of the Canterbury Tales, these encounters tell a narrative of intellectual culture and art over the course of a millennium. Two of the manuscripts visited are now in libraries of North America, the Morgan Library in New York and the Getty Museum in Los Angeles. Part travel book, part detective story, part conversation with the reader, Meetings with Remarkable Manuscripts allows us to experience some of the greatest works of art in our culture to give us a different perspective on history and on how we come by knowledge.
