Granting trade secrets protection under property law seemed feasible without any hindrances. Indeed, over time courts have relied on property law to provide plaintiffs with remedies. 3 However, a deeper analysis and comparison of trade secrets law and property law shows that they are not really compatible. The main problem is twofold: first, the intangible nature of trade secrets; secondly, the questionable validity of restraining agreements pertaining to trade secrets.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning intellectual property rights in the Switzerland. It covers every type of intellectual property right in depth — copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear

overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in the Switzerland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law.

As technological developments multiply around the globe--even as the patenting of human genes comes under serious discussion--nations, companies, and researchers find themselves in conflict over intellectual property rights (IPRs). Now, an international group of experts presents the first multidisciplinary look at IPRs in an age of explosive growth in science and technology. This thought-provoking volume offers an update on current international IPR negotiations and includes case studies on software, computer chips, optoelectronics, and biotechnology--areas characterized by high development cost and easy reproducibility. The volume covers these and other issues: Modern economic theory as a basis for approaching international IPRs. U.S. intellectual property practices versus those in Japan, India, the European Community, and the developing and newly industrializing countries. Trends in science and technology and how they affect IPRs. Pros and cons of a uniform international IPRs regime versus a system reflecting national differences.

This report examines the importance of intellectual property (IP), ranging from patents, copyright, design and trade marks, and whether in the age of globalization, digitization and increasing economic specialization it still creates incentives for innovation, without unduly limiting access to consumers and stifling further innovation. The report does recommend a radical overhaul of the system, with the review concentrating on three areas, and setting out the following recommendations: (i) strengthening enforcement of IP rights, whether through clamping down on piracy or trade in counterfeit goods; (ii) reducing costs of registering and litigating IP rights for businesses large and small; (iii) improving the balance and flexibility of IP rights to allow individuals, businesses and institutions to use content in ways consistent with the digital age.
