“A compelling appeal, at just the right time, for continuing to look up.”—Air & Space America’s space program is at a turning point. After decades of global primacy, NASA has ended the space-shuttle program, cutting off its access to space. No astronauts will be launched in an American craft, from American soil, until the 2020s, and NASA may soon find itself eclipsed by other countries’ space programs. With his signature wit and thought-provoking insights, Neil deGrasse Tyson—one of our foremost thinkers on all things space—illuminates the past, present, and future of space exploration

and brilliantly reminds us why NASA matters now as much as ever. As Tyson reveals, exploring the space frontier can profoundly enrich many aspects of our daily lives, from education systems and the economy to national security and morale. For America to maintain its status as a global leader and a technological innovator, he explains, we must regain our enthusiasm and curiosity about what lies beyond our world. Provocative, humorous, and wonderfully readable, *Space Chronicles* represents the best of Tyson's recent commentary, including a must-read prologue on NASA and partisan politics. Reflecting on topics that range from scientific literacy to space-travel missteps, Tyson gives us an urgent, clear-eyed, and ultimately inspiring vision for the future.

"Emilia Ferreiro is one of the great thinkers in the Americas on the issues surrounding literacy. Three of her most important lectures are presented in this book. Her views have changed the systems of education in her own country, Mexico, and have had a radical impact on education in Brazil, where she is the recipient of the country's highest distinction. Her ideas have ideological and political implications for policies regarding publishing (including the publishing of textbooks), access to books and the development of readers all over the world." "Although poor countries have not overcome illiteracy, rich countries are finding that a basic education does not guarantee fully functional readers. While some of us are

fluent in the language of hypertext, e-mail and the virtual pages of non-existent books, there are others who have not mastered newspapers or books." "If democracy is incompatible with an illiterate citizenry, full democracy requires an ability to read that goes beyond the deciphering of words. This ability is the right of children who will grow up as free citizens in a world where linguistic and cultural diversity are as important as biodiversity."--BOOK JACKET.
