Two studies are within the scope of the Beginning Reading review protocol but do not meet WWC evidence standards. Both studies use a quasi-experimental design but do not establish that the comparison group was comparable to the intervention group prior to the start of the intervention. Twelve studies are out of the scope of the Beginning Reading review protocol because they have an ineligible study design. Three studies do not use a comparison group design, a regression discontinuity design, or a single-case design. Nine studies are literature reviews or meta-analyses. Three studies are out of the scope of the Beginning Reading review protocol for reasons other than study design. One study does not include students in grades K-3, as specified in the protocol. One study includes fewer than 50% general education students. One study examined the intervention combined with other components,

Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide *Uncovering the Logic of English* challenges the notion that English is illogical by systematically explaining English spelling and answering questions like "Why is there a silent final E in have, large, and house?" and "Why is discussion spelled with -sion rather than -tion?" With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess The author's inspiring commentary makes a compelling case that
