The Lacanian subject : between language and jouissance. This book presents the radically new theory of subjectivity found in the work of Jacques Lacan. Against the tide of post-structuralist thinkers who announce "the death of the subject," Bruce Fink explores what it means to come into being as a subject where impersonal forces once reigned, to subjectify the alien roll of the dice at the beginning of our universe, and to make the knotted web of our parents' procreative desires our own.

In both the French- and English-language literature on the subject, Lacan's discussion is often mistakenly understood to center around the dialectic of all and some; this misunderstanding is especially egregious in the translated chapters of *Encore* (Seminar XX) that appear in *Feminine Sexuality*.

For Lacan, the subject is split and it is the unconscious that must supersede the conscious mind, as in U/c, meaning that the conscious mind is always overridden by the forces beneath, so to speak. In fact as Bruce Fink pointed out in *The Lacanian Subject: Between Language and Jouissance*, "the subject is nothing but his split." The "splitting of the I," means that the subject is split when s/he is inserted into the Symbolic Order.

mastery of the speaking subject (slips of the tongue, and so forth). In this view of language, the subject is formed in a process which turns the small animal into a human child. The subject is seen as constituted by language and it appropriates the world through language.

Function of Language - No Subject - Encyclopedia of ...

Lacan distinguishes between languages and codes; unlike codes, in language there is no stable one-to-one correspondence between sign and referent, nor between signified and signifier. It is this property of language which gives rise to the inherent ambiguity of all discourse, which can only be interpreted by playing on the homophony and other forms of equivocation (l'équivoque).

Language - No Subject - Encyclopedia of Psychoanalysis ...

In the fifties, the focus of Lacan's interest shifted to the symbolic order of kinship, culture, social structure and roles—all mediated by the acquisition of language—into which each one of us is born and with which we all have to come to terms.

unconscious is less something inside the person as an 'intersubjective' space between people. According to Lacan, 'the unconscious is structured like language.' Lacan sees the child not as the agent of symbolization but as the recipient of desire from an Other (the Mother). When the child plays with things disappearing and finding them again, they are recreating the missing mother.

The Lacanian subject is the inverse of Descartes' cogito I think, therefore I am ... cogito ergo sum Under set theory, the cartesian subject can be mapped as this: For Descartes, the conscious subject is the master of its own thought. It was the moment when we are thinking that our being is affirmed.

Indeed, this is the first book to appear in English that displays a firm grasp of both theory and practice of Lacanian psychoanalysis, the author being one of the only Americans to have undergone full training with Lacan's school in Paris. Fink Leads the reader step by step into Lacan's conceptual system to explain how one comes to be a subject--leading to psychosis. Presenting Lacan's theory in the context of his clinical preoccupations, Fink provides the most balanced, sophisticated, and penetrating view of Lacan's work to date--invaluable to the initiated and the uninitiated alike.

Originally published in 1991, this volume tackles the diverse teachings of the great psychoanalyst and theoretician. Written by some of the leading American and European Lacanian scholars and practitioners, the essays attempt to come to terms with his complex relation to the culture of contemporary psychoanalysis. The volume presents useful insights into Lacan's innovative theories on the nature of language and the subject. Many of the essays probe the

importance of psychoanalysis for problems of signifier and referent in the philosophy of language; others explore the difficulties men and women have in negotiating the sexual differences that divide them. A major contribution to the new reception of Jacques Lacan in the English-speaking world, *Lacan and the Subject of Language* will challenge those who believe that they have already 'mastered' Lacanian thought. The insights offered here will pave the way for further developments.

Prompted by the thirtieth anniversary of the French philosopher Jacques Lacan's death, this exchange between two prominent intellectuals is rich with surprising insights. Alain Badiou shares the clearest, most detailed account to date of his profound indebtedness to Lacanian psychoanalysis. He explains in depth the tools Lacan gave him to navigate the extremes of his other two philosophical "masters," Jean-Paul Sartre and Louis Althusser. Élisabeth Roudinesco supplements Badiou's experience with her own perspective on the troubled landscape of the French analytic world since Lacan's death—critiquing, for example, the link (or lack thereof) between politics and psychoanalysis in Lacan's work, among other issues. Their dynamic dialogue draws readers into an intimate, at times contentious, yet ultimately productive debate that

reinvigorates the work of a pivotal twentieth-century thinker.

This work presents thoughts on the Lacanian subject: What are we as a speaking being? What makes us a human subject from a psychoanalytic perspective? Is it feelings and affect that make us a human? Or was it the Freudian invention of the unconscious that drew a line between human and a non-human? What can be learnt from the subject of the unconscious in the clinic of psychoanalysis that can help us to approach these questions? Berjanet Jazani takes examples from the psychoanalytic clinic as well as cultural references ranging from ancient Persia to London's Theatreland in order to elaborate the question of subjectivity, reality and truth from a psychoanalytic perspective. In the era of hyperreality, the agency of branding and marketing strategies has overshadowed the reality of a human being, his true nature and agency. The hyperreality of contemporary society creates in each individual a false hope of becoming a high-fidelity copy of their idols, and such a fallacy has led many to believe that this is what determines their being in a social bond. Jazani explores the question of the reality and mortality of a subject through a Lacanian prism, from the theorising of analytical subjectivity that starts with the Freudian Oedipal myth more than a century ago to the futurist aspiration to fabricate human beings according to some ideal

model. This book will be important reading for students and academics of Lacanian psychoanalysis, as well as professionals concerned with complex social problems.

This collection introduces and develops Lacanian thought concerning the relations among language, subjectivity, and society. Lacanian Theory of Discourse provides an account of how language both interacts with and constitutes structures of subjectivity, producing specific attitudes and behaviors as well as significant social effects.

This book presents a theory of autistic subjectivity from a Lacanian psychoanalytic perspective. Dr. Brenner describes autism as a singular mode of being that is fundamentally linked to one's identity and basic practices of existence, offering a rigorous alternative to treating autism as a mental or physical disorder. Drawing on Freud and Lacan's psychoanalytic understanding of the subject, Brenner outlines the unique features of the autistic subjective structure and provides a comprehensive synthesis of contemporary work on the psychoanalysis of autism. The book examines research by theorists including Jean-Claude Maleval, Éric Laurent, Rosine and Robert Lefort that has been largely unavailable to Anglophone audiences until now. In this book autism is posited to be a singular subjective structure not reducible to

neurosis or psychosis. In accordance with the Lacanian approach, autism is examined with detailed attention to the subject's use of language, culminating in Brenner's "autistic linguistic spectrum." A compelling read for students and scholars of psychoanalysis and autism researchers and clinicians.

About this Book... "A major and long overdue addition to the America/English psychoanalytic literature. . . . All major concepts—among them the mirror stage, the Name-of-the-Father, metaphor and metonymy, the phallus, the foreclosure of the subject—are developed in depth." -Nicholas Kouretsas, Harvard Medical School

To read Lacan closely is to follow him to the letter, to take him literally, making the wager that he comes right out and says what he means in many cases, though much of his argument must be reconstructed through a line-by-line examination. And this is precisely what Bruce Fink does in this ambitious book, a fine analysis of Lacan's work on

language and psychoanalytic treatment conducted on the basis of a very close reading of texts in his *Icrites: A Selection*. As a translator and renowned proponent of Lacan's works, Fink is an especially adept and congenial guide through the complexities of Lacanian literature and concepts. He devotes considerable space to notions that have been particularly prone to misunderstanding, notions such as "the sliding of the signified under the signifier," or that have gone seemingly unnoticed, such as "the ego is the metonymy of desire." Fink also pays special attention to psychoanalytic concepts, like affect, that Lacan is sometimes thought to neglect, and to controversial concepts, like the phallus. From a parsing of Lacan's claim that "commenting on a text is like doing an analysis," to sustained readings of "The Instance of the Letter in the Unconscious," "The Direction of the Treatment," and "Subversion of the Subject" (with particular attention given to the workings of the Graph of Desire), Fink's book is a work of unmatched subtlety, depth, and detail, providing a valuable new perspective on one of the twentieth century's most important thinkers. Bruce Fink is a practicing Lacanian psychoanalyst, analytic supervisor, and professor of psychology at Duquesne University in Pittsburgh. He is the author of *A Clinical Introduction to Lacanian Psychoanalysis* (1997) and *The Lacanian Subject* (1995). He has coedited three volumes on Lacan's seminars and is the translator of

“Stages refreshing encounters between Lacanian psychoanalysis and its others: Kristeva, Heidegger, Derrida, or Foucault, to name just a few thinkers.” —Ewa Ziarek, author of *An Ethics of Dissensus* This book weaves together three themes at the intersection of Jacques Lacan and the philosophical tradition. The first is the question of time and memory. How do these problems call for a revision of Lacan’s purported “ahistoricism,” and how does the temporality of the subject in Lacan intersect with the questions of temporality initiated by Heidegger and then developed by contemporary French philosophy? The second question concerns the status of the body in Lacanian theory, especially in connection with emotion and affect, which Lacanian theory is commonly thought to ignore, but which the concept of jouissance was developed to address. Finally, it aims to explore, beyond the strict limits of Lacanian theory, possible points of intersection between psychoanalysis and other domains, including questions of race, biology, and evolutionary theory. The book also engages literary texts. *Antigone*, *Ovid’s Metamorphoses*, *Hamlet*, and even *Wordsworth* become the muses who oblige psychoanalysis and philosophy to listen

once again to the provocations of poetry, which always disrupts our familiar notions of time and memory, of history and bodily or affective experience, and of subjectivity itself. “Shepherdson shows with admirable clarity, cogency and competence that psychoanalysis finds an anthropology of love, hate, desire, beauty, fantasy and memory while keeping its cutting edge in today’s discussions of war, race, sexual difference and tragedy. Thanks to him, thinking with Lacan becomes an act of enlightenment.” –Jean-Michel Rabaté, author of Lacan in America
