Originally published in 2004, the Kingdon Pocket Guide to African Mammals quickly became the field guide of choice to take on African safaris. Its compact format makes it ideal for use in the field, while its coverage is the most comprehensive currently possible in this format. Adapted from the Kingdon Field Guide to African Mammals, the greatly condensed text focuses on essential information such as identification and distribution, while the author's superb illustrations have been rearranged into an easy-to-use plate format and placed opposite the text. Complex and more obscure groups like the bats and certain rodent families are summarised by genera. Over 500 maps plot the distribution of all larger species, and for smaller mammals the maps show distribution by genus. This is a completely revised second edition of this popular guide. The information and taxonomy have been updated to follow the newly published second edition of the Kingdon Field Guide to African Mammals (2015), and this new edition of the pocket guide contains several new species and illustrations. The maps have been completely replaced and there are now 200 more maps than in the original edition.

Tanzania has grown to be one of the top safari destinations in Africa. This new edition of Northern Tanzania focuses solely on the northern region and Zanzibar. This area accounts for a tiny fraction of the country's surface area but around 95% of tourist developments. Written by Africa expert Philip Briggs, the guide reflects the growing trend away from large lodges towards small exclusive eco-friendly camps in remote parts of the Serengeti and other major reserves. This edition is more critically selective than previous editions, detailing the best on offer in all price brackets. It includes new chapters on the North Coast and on the Usambara Mountains both of which offer good off-the-beaten-track travel opportunities, as well as an expanded chapter on Lake Victoria. There is in-depth coverage of Tanzania's wildlife including where to see tree-climbing lions, and a full-colour wildlife guide. Philip Briggs keeps readers up-to-date with the highly controversial proposal to build a highway through the Serengeti. Northern Tanzania is an essential travel companion for both first-time visitors and seasoned safari-goers.

An award-winning author-photographer gives detailed instruction for other would-be safari photographers and treats readers to his own 14-day safari journal. He reveals how to get the best photos of birds, reptiles, large animals, people and scenery when visiting Kenya on safari. 150 color photos.

"A work of tremendous scope. . . . Amateur naturalists and tourists to the parks of Africa and finally professionals will find this a stimulating, well-documented summary."--John F. Eisenberg, Florida Museum of Natural History "We have seen in the field how very helpful and informative The Behavior Guide is. Our knowledgeable safari guides turned often to their prized and already well-thumbed copies, and we continue to refer to ours now that we are back home."--Douglas F. Williamson, Jr., National Council, World Wildlife Fund, U.S. "A fascinating, perceptive, and enjoyable travel companion heightens the pleasure of being afield. The Behavior Guide to African Mammals is that ideal companion. Lucid, accurate, and marvelously illustrated, the book is a basic reference for anyone interested in natural history."--George B. Schaller, author of The Serengethi Lion and The Deer and the Tiger "A remarkable review of what is known about the larger African mammals."--A.R.E.
